

Purifii SURFACE GUV System

In a public restroom Purifii SURFACE units are wall mounted above the sink and toilet to disinfect high touch surfaces when no one is in the room. Fully redundant, UL Listed controls ensure that the system is never on when the restroom is occupied, and a built-in timer ensures that the proper dose is applied. The streamlined Surface units include rotatable light engines to ensure that UV energy is directed to precisely the right surfaces.

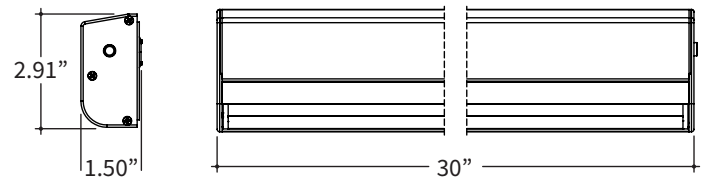

Purifii SURFACE

dimensions

features

- Purifii SURFACE is an architectural grade, Low-Profile, surface germicidal system that capitalizes on the proven ability of UV-C to inactivate surface pathogens, including on high-touch services.
- Purifii SURFACE supports the elimination of viruses and other microorganisms such as bacteria and fungi – working in just seconds to help safeguard surfaces that are used on a regular basis.
- Purifii SURFACE single driver configuration disinfection treatments work in a matter of seconds and shows 99.96% effectiveness.²
- Mercury free, utilizing a patent pending optical LED light engine to direct UV-C energy precisely onto specific areas on a surface.
- Purifii SURFACE systems work in conjunction with the Purifii SURFACE Control System.
- Adapts to any size environment, working simultaneously even in large environments.
- Field-friendly and highly adaptable, supporting a simple installation process.
- Features an integrated driver and is available in 30".
- Factory sealed wet-rated.

²) Independent lab test: SURFACE GUV System tests conducted by Innovative Bioanalysis.

Purifii SURFACE Testing conducted by independent labs shows a 99.99% reduction in SARS-CoV-2 in one minute using Luminii's UV-C LED light engine on surface applications.

PURIFII GUV systems are not intended for use as a medical device and are not registered as such. The systems are not intended to diagnose, treat, cure, or prevent any disease. Purifii SURFACE is registered as a pesticide device.

"Disinfection", "treatment", and "germicidal" as used herein are general in nature and not intended to implicate defined regulatory terms.

Purifii SURFACE products require that a space be 100% unoccupied to be activated to prevent UV harm.
